

BC201 Series

MAGNETIC CARD READER

Highly Secure and Adaptable Debit Card Reader

Start recovering your printing and copying costs with Boscop's BC201 card reader. This unit provides access to photocopiers, printers and microfilm equipment through the use of an encoded reusable plastic card.

Works with most copiers and microfiche machines

Can be used with print release stations to vend computer print jobs!

Key Features

Programmable

Multiple site codes (user groups) can be assigned to each card reader, with two price lines available per site code.

Accountable

Internal electronic meters record all transactions that take place, making reconciliation easy. Administrators can view reports on the display, print them to a hand held printer or download them to a laptop via a serial cable. Administration can assign machine identification numbers to aid in auditing meter information.

Compatible

This powerful device connects with nearly any brand of copier or printer and interfaces with all leading print vend software packages. Compatible with ACT, DANYL, Debitex, ICS, InterCard, ITC and XCP card systems.

Reliable and Secure

Battery backup memory prevents the loss of data in the event of a power outage.

Accountor Systems

16W361 S. Frontage Road, Ste. 107
Burr Ridge, IL 60527
Phone: 630-325-9200
Fax: 630-325-9201

How It Works

Step 1.

The card reader reads formatted data on the magnetic stripe, known as a site code, allowing access only to authorized users.

Step 2.

After access is granted, each transaction reduces the value on the card.

Step 3.

The new value is displayed on the L. E. D. display of the card reader and then written on to the magnetic stripe of the card.

Specifications

Enclosure
